Description

This extraordinary handcrafted piece captures the raw power and majesty of a stormy sea in full motion. The ceramic, meticulously crafted with precision and passion, reflects the wild and dynamic energy of the waves crashing against the shore, while the solid, natural wood frame provides a warm and welcoming contrast to the composition.

Shades of deep blue, emerald green, and white foam highlight the intensity of the waves, accentuated by touches of silver and gray, creating a play of light and shadow that recreates the force of the stormy sea. Every detail, from the powerful, rising waves to the foam exploding in thousands of particles, conveys a sense of movement and vitality.

A unique artwork that brings the emotion and grandeur of nature into any space. Perfect for those who love the strength and beauty of natural elements, this ceramic on wood piece is ideal for modern and contemporary interiors, as well as for anyone seeking an energetic and dynamic touch to enrich their home or office.

Ceramic on wood. Measures 43cm x 36cm.
